Clownfish

Dory

Blue Tang

Bruce

Great White shark

Crush and Squirt

Sea turtle

Gill

Moorish Idol

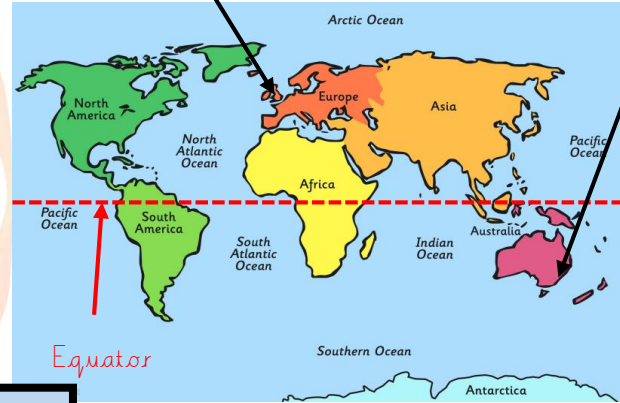

PSHE Focus:
Fear

Locations

Sheffield, UK

Sydney, Australia

Remember:

The equator is an imaginary line around the middle of the Earth. It is the hottest part of the Earth as it is closest to the Sun.

The Great Barrier Reef - Australia

This is the largest coral reef in the world. A coral reef is a collection of tiny little animals and plants that are found under the sea in hot places. They are home to lots of different sea creatures.

The Great Barrier Reef is so big, it can be seen from space!

Comparing Sheffield and Sydney

Sydney is much hotter than Sheffield because it is closer to the equator. When it is summer in the UK, it is winter in Australia. Sydney is on the coast which means it is next to the sea. Sheffield is inland which means it is not near the sea.
