**04.07.25**

We have had a busy week in nursery!  
First, the children dug up the potatoes they chitted and planted back in March.

Then the children had their class marble jar treats. They chose cheese & crackers and a film and popcorn.

Lastly, using the potatoes we had grown, the children tried some little homemade chips. They were very popular!

We also wanted to share this picture of Rosie's castle with you. Since Rosie started nursery, we have been so impressed with how imaginative she is! She makes the most fantastic creations. We can't wait to see what she makes up with next!

### Transition

This week, our focus has been on Transition and the big feelings that often come with change. On Wednesday, our Reception children visited their new Year 1 classes—either Butterfly Class or Ladybird Class.

They spent the day getting to know their new teachers, learning facts about the animal their class is named after, and exploring shading techniques to create beautiful drawings of butterflies and ladybirds.

We couldn't be prouder of how confidently and positively every child approached the day. They took everything in their stride, and the Year 1 teachers were full of praise for their enthusiasm, kindness, and curiosity.
